Callus®

## Heels

### Fissures and cracking

Especially in summer, our feet suffer because they are less protected. They form annoying cracks on the heels that, if not well hydrated, risk becoming real wounds (fissures). In these cases, treatment with Callus Heels, a specific product made of beeswax and allantoin, softens the skin of the heel returning its natural elasticity and resolving within days the problem of cracking.

This product can be applied in diabetic patients  
NO UREA

### Contiene

Babassu butter and shea butter  
Allantoin  
Collagen plant  
Sodium lactate  
Panthenol

*emollient*  
*healing*  
*strong film-forming properties of support and water tank to the skin*  
*moisturizer*  
*tonic and stimulating healthy cell*

### Use

Gently massage into dry, rough areas such as the heels, elbows and knees. For heels, apply for 10-15 minutes and rinse with warm water. Not to be used on face.

Efficacy dermatologically tested

Visible results in 3 days

After 3 days: + 32% Improved softness and smoothness of the heel - First visible results  
After 7 days: + 61% Improved heel's skin status  
After 14 days: + 83% Heel's skin soft and smooth.
